

# Linnean Centre symposium for early career plant scientists

5 March 2019

## Program *Lecture hall "X", Ulls hus, Ultuna*

- 9.00-9.10      **Linnean Centre coordinator** - *Introduction*
- 9.10-9.40      **Contance Musseau** - *Towards the identification and characterization of new regulators of fruit tissue morphology*
- 9.40-10.10     **Yazhong Wang** - *Deciphering four key players in initiating and repairing DNA double strand breaks during maize meiosis*
- 10.10-10.40   **Benjamin Fuchs** - *Endophyte mediated plant defense modulated by season, plant age and species-specific herbivory*
- 10.40-11.00   **Coffee break**
- 11.00-11.30   **Shweta Roy** - *Fine-tuning of plant defense responses by positive and negative regulators of immunity*
- 11.30-12.00   **Andries Temme** – *Abiotic stress tolerance in sunflower; from traits to genes and back again*
- 12.00-12.30   **János Urbancsok** - *Endogenous biological effects induced by externally supplemented glucosinolate hydrolysis products (GHPs) on *Arabidopsis thaliana**
